

# How Inveniam IO powers Real-World Asset Vaults and DeFi →

 **INVENIAM**

[inveniam.io](https://inveniam.io)

Our decentralized data operations platform securely connects tokenized asset data at its source to permissioned Oracles without data leakage, unlocking asset truth in RWA-backed DeFi.

Inveniam IO cryptographically anchors source documents and extracted data points, and generates URIs for permissioned validators to independently verify origin, state, and calculations without exposing sensitive data onchain.

Name	Extraction status	DLT status
  <span>Asset_Overview.PDF</span>	<span>Completed</span>	<span>Verified</span>

Ask Inveniam AI

What's the current occupancy rate for this asset?

According to Section 4.2, the current occupancy rate is 92%, with two vacant units totalling 5,000 sq. ft. Would you like details on the vacant spaces?

4.2 The current occupancy rate is 92%, wi

# What this means for DeFi

- Dynamic real-time pricing for illiquid and private real-world assets
- More effective and scalable utility for RWAs as collateral
- Modularity in Vault Strategies beyond liquid assets
- Expansion of DeFi from crypto to trillions in private market assets
